

## Government High School, Indore kids visiting Chemistry labs

Nov. 22, 2018

Under the scheme Rashtriya Avishkar Abhiyan, over 600 High school students from several nearby Government Schools of Indore visited the Discipline of Chemistry on November 22, 2018 for laboratory tour. With an aim to give the students a sense of chemistry laboratory, we arranged a brief tour to show the general functioning of the laboratory and instruments used in the Chemistry lab.

Research Scholars from IIT Indore shared their knowledge with the students and explained about the various techniques and processes used in the laboratories. They also explained them about the safety instructions which play a major role in every chemistry labs.

Students were taken to specialized sections where tests are performed and got a chance to understand the functioning of all the latest and updated instruments. Kids were demonstrated the working of fumehood, rotary evaporator, column chromatography, TLC plates and so on.

Students showed their interests and actively participated in the visit. It was nice to interact with these young minds – hope we were able to inspire some of them to do Chemistry and good Science in future!!!
